

Western Electronics has been in business since 1978, but its current structure was formed by a series of acquisitions in 1999. Western Electronics has contract manufacturing operations in Meridian, ID., and Westminster, CO. A recognized leading regional Contract Electronics Manufacturing Services company (CEMS), Western Electronics provides manufacturing service solutions for original equipment manufacturer (OEM) companies primarily located in the western region of North America.

“Our market focus is small- to medium-size OEM companies that require a high level of quality, delivery, flexibility and responsiveness at a competitive cost in the outsourcing of product subassemblies or product assembly,” said Rob Subia, Western Electronics president.

“We predominantly support customers with low- to medium-volume requirements under our ‘EKG’ Strategy, with strategic partnerships to manage the low-cost Asian requirements of our customers.”

Western Electronics serves businesses of all sizes, from emerging growth companies to multi-national corporations, involved in a wide range of markets: aerospace, computers and peripherals, instrumentation, telecommunications, medical, gaming, consumer electronics, vending, utilities, industrial and commercial vehicles, and industrial controls. Customers include AMX, GameTech International, GE, IFT, IntraLase, Mobility, Polyvision and Xilinx.
