

## WESTERN ELECTRONICS AWARDED ISO CERTIFICATION FOR ITS INTERCONNECT DIVISION

Meridian, Idaho June, 2007- Western Electronics, a recognized leading Regional Contract Electronics Manufacturing Services company providing manufacturing service solutions to original equipment manufacturers (OEMs), is pleased to announce that it has been awarded its ISO 9001:2000 Certification for its Interconnect Division.

“Western Electronics is delighted to be awarded ISO 9001 Certification in our Interconnect Group, and while we have been ISO Compliant for some time we thought it important to complete our total enterprise Certification. Congratulations to our Team for their ongoing commitment to quality and their latest achievement.”

Western Electronics has been ISO Certified at its two Printed Circuit Board Assembly (PCBA) facilities since 2001, and now has all 3 of its operations certified to ISO 9001:2000 Standard.

About Western Electronics – [www.westernelectronics.com](http://www.westernelectronics.com)

Western Electronics is a Regional Contract Manufacturer who provides manufacturing solutions to customers primarily located in the Western portion of the United States. Its focus is small to medium sized OEMs who require a high level of service deliverables including Quality, Delivery, Flexibility, Responsiveness, and overall Cost. Western Electronics has been in business since 1978, is a recognized performer with its current customer base, and is growing in the marketplace as a result.
